## PACIFIC BRIDGE, ROGERS COMBINE LOWEST BIDDERS

MacDonald - Kahn, Eaton & Smith Also Figure Job; One Bid for Bonding

Low bids aggregating approximately \$897,600 were submitted yesterday to the State Department of Public Works in San Francisco for construction of track work for the San Francisco-Oakland Bay Bridge interurban railway system. The low bidders were:

Pacific Bridge Co., Balfour building, San Francisco, at \$496,236 for Proposal A, track work on the main bridge and the San Francisco loop.

Rogers, Copeland, Cassell & Burghart, 2601 Wood street, Oakland, at \$428,363 on Proposal B, for track work in the East Bay Yard.

Only one proposal was received for bonding of the track work and contract rail. It was submitted by General Welding Co., 951 Folsom street, San Francisco, and amounted to \$32,527.

The bids of Rogers, Copeland, Cassell & Burghart (operating locally from the Eastbay office of Bates & Rogers Construction Co.) on Proposal A was \$565,969, or nearly \$95,000 over that of Pacific Bridge Company.

MacDonald & Kahn Co., Ltd., San Francisco, submitted a single bid on Proposal C, covering the entire work, at \$982,289.

Eaton & Smith, San Francisco, bid \$700,390 on Proposal A and \$469,000 on Proposal B.

The Rogers, Copeland, Cassell & Burghart bid carried a stipulation that if the group proved to be low on both schedules, award would be accepted only for the East Bay Yard work, while award of either contract would be acceptable if the bidder proved low only on one.

New orders for steel boilers taken during July, 1938, totaled 1,181 a slight gain over the total of 1,091 orders taken during the same month last year, according to the monthly report of the Bureau of Census.

## OPEN AIR DEPOT ELECTRICAL BIDS

Scott-Buttner Electric Company, at \$52,595, yesterday submitted the low bid to the Constructing Quartermaster for construction and completion of an electric distribution and street lighting system at the Sacramento Air Depot. Their bid on an alternate calling for a deduction of the entire street lighting system was omitted was minus \$9800, about \$1200 lower than the second lowest bidder.

The second lowest bidder was Alta Electric and Mechanical Company, at \$54,953, followed by Underground Construction Company, at \$55,398.

## Support for Transit Bond Proposal Urged

Organized Labor, and the construction industry, should give energetic support to the proposed \$49,250,000 subway rapid transit bond issue appearing on the November ballot, according to John P. McLaughlin, outstanding labor member of the Public Utilities Commission.

"With 49 per cent of the entire bond issue to be spent for labor, the workers of San Francisco will have a bigger stake in the actual subway construction than any other group," said Mr. McLaughlin.

The need for an immediate improvement in transportation facilities throughout the city is apparent to all, he declared. An exhaustive study of conditions and consultation with New York experts has convinced commission engineers that the only practical answer to the problem lies in subway rapid transit. Mr. McLaughlin estimated that whatever increases in taxes results from the bond issue will be offset by population and property value increases due to the improvement. A "yes" vote on the bonds is recommended by endorsement of the Building Trades Council and A. Watchman, council president, is active vice-chairman of the Rapid Transit Citizens Committee.

## RAISCH LOW ON GREENVILLE SEPARATION JOB

San Jose Contractor Bids State Overpass on Alameda Highway

(Special to Daily Pacific Builder) SACRAMENTO, Sept. 15.—A. J. Raisch, San Jose, today submitted the low proposal of \$104,290.50 to the State Division of Highways for construction of a reinforced concrete girder overhead crossing over the Southern Pacific and Western Pacific railroad tracks at Greenville, Alameda county.

The overhead crossing will consist of one 50-foot 6-inch span, eight 49-foot spans, and one 16-foot cantilever.

Other bidders were: R. R. Bishop, \$108,690.50; Carl N. Swenson Co., \$109,196.40; J. F. Knapp, \$109,907; John Rocca, \$113,707, and C. W. Calletti, \$117,239.

### Other Projects

The job was the first of two State projects in Alameda county for which bids were scheduled to be opened this month. The second contract, for which bids will be opened September 29, involves construction of two grade separations, one over the tracks of the Southern Pacific Company at Redmond, and the other under the Western Pacific tracks at Stone Cut.

The State Division of Highways will open bids September 16 on two contracts for work in Orange and Los Angeles counties. The Orange county project will involve grading and paving with Portland cement concrete about 2.6 miles of Hampshire avenue, between Coast Blvd. and Garfield street.

The Los Angeles County job involves surfacing about one mile of highway between Atlantic boulevard and New avenue at Monterey Park. The work involves: 1400 cubic yards roadway excavation; 32,000 square yards of asphalt paint binder; 720 tons asphalt cement; 6450 tons mineral aggregate, and 1200 tons imported subgrade material.

#### CONTRACT AWARDED

**LOS ANGELES, Calif.**—J. F. Shea Co. 617 S. Olive St., Los Angeles, at \$2,261,581.50, was awarded contract by the Board of Directors of the Metropolitan Water District, Los Angeles, for the construction of the Palos Verdes Feeder of the Colorado River Aqueduct, under Spec. 225. The line is approximately 17.4 miles in length, and is located in South Pasadena, Los Angeles, and Vernon, and in unincorporated county territory. Plans for the project were prepared by F. E. Weymouth, General Manager and Chief Engineer. The contract was awarded on Schedules, as follows:

Sch. 21-SC—Gunitite-coated welded steel pipe with spun mortar lining and gunited joints, between Stations 0 plus 10.25 and 297 plus 59, inside diam. of steel pipe, 55 in.; length, 28,930 ft.

Sch. 22-SC—Same type between Stations 297 plus 67 and 590 plus 00; inside diam. of steel pipe, 51 in.; length, 28,810 ft.

Sch. 23-SC—Same type between Stations 590 plus 00 and 951 plus 85; inside diam. of steel pipe, 51 in.; length, 31,470 ft.

The materials, including cement, coal tar enamel, gunitite, reinf. mesh, etc., to be furnished by the district, amount to \$177,300, making the total for the line, \$2,538,881.50.

Work will probably start about October 15 and the time for completion, as fixed by the specifications, is Dec. 31, 1928.

The engineer's analysis of the bids showed, in addition to the above figures upon which the award was made, that J. F. Shea Co. was also low on Schedules 21-SE, 22-SE, and 23-SE, gunitite coated welded steel pipe with coal tar enamel lining, a total of \$2,345,572, with district furnished materials amounting to \$205,570, or a total of \$2,551,142.

The other combination, next in line, was United Concrete Pipe Corp. on Schedule 21-P for coated concrete pipe, at \$731,192.75 and J. F. Shea Co. on Schedules 22-SC and 23-SC, \$1,579,164, or a total for the combination of \$2,310,366.75, with district furnished materials amounting to \$241,465, or a grand total of \$2,551,821.75.

Complete bids were published September 7th in the Daily Pacific Builder.

## BIDS OCT. 13 ON CATENARY, FEEDER WORK

State Schedules Proposals on  
Bay Bridge Railway  
"Trolley" Job

SACRAMENTO, Sept. 21.—The San Francisco-Oakland Bay Bridge Division of the State Department of Public Works today issued a call for bids for construction of the catenary and feeders for the bridge railway facilities on the main bridge, San Francisco Loop and East Bay Yard.

Bids will be opened at 2 P. M. on October 13 in the San Francisco office of the San Francisco-Oakland Bay Bridge Division at 500 Sansome street.

Construction of the catenary, popularly known as "trolley wires" and feeders to the trolley wires will be a long step towards completion of the bridge railway facilities, engineers say.

### Two Contracts

Bids for the work will be taken under two contracts. Contract R-10 will call for construction of trolley wires and feeders on the main bridge and San Francisco Loop. Contract R-21C will involve work in the East Bay Yards.

The division of the job into two contracts is only for purposes of record, according to the Division of Highways, since the entire job will be awarded as one contract.

Principal items include: feeder cable at San Francisco substation; feeder cables at Island substation and tie station; Island tie station and equipment; 12 disconnecting switches, type K; 18 disconnecting switches, type R; feeder cable at Mole station; and 50,000 lbs. of miscellaneous iron.

Plans and specifications may be obtained from the office of the San Francisco-Oakland Bay Bridge Division at 500 Sansome street, upon deposit of fifty dollars, of which forty dollars is returnable.

Unusual lighting effects, designed to heighten impressive architectural features of its buildings, have been planned for the 1939 Golden Gate International Exposition.

## BAY SPAN TRACK CONTRACTS LET

SACRAMENTO, Sept. 22.—Award of contracts for construction of track work and bonding for the San Francisco-Oakland Bay Bridge railway facilities was announced here today by State Director of Public Works Earl Lee Kelly. Pacific Bridge Co., at \$496,236 was awarded track work on the main bridge and the San Francisco loop. Track work in the East Bay Yard went to Rogers, Copeland, Cassell & Burghart, Oakland, at \$428,363.

Only two bidders for bonding of the track work and contact rail was General Welding Co., San Francisco, and the contract was let to this firm at the bid price of \$32,527.

## STATE INVITES BIDS ON FOUR HIGHWAY JOBS

Grading, Paving, Oil Treatment  
Openings Set for Oc-  
tober 13th

—Four contracts for work on state highways were authorized for advertising today by the State Highway Commission.

Bids on all four jobs will be opened at the Sacramento office of the State Division of Highways October 13, it was announced.

The projects are located as follows:

**Kings County:** paving with asphalt concrete about six and four-tenths miles, between Hanford and Alcorn Bridge.

**Mono County:** grading approximately two and two-tenths miles, between Route 23 and June Lake.

**Inyo County:** applying penetration oil treatment to about twenty and one-half miles of existing roadbed. The work is located between one and one-tenth miles east of Saline Valley road and Panamint Sink.

**Calaveras County:** grading and applying liquid asphalt to approximately six and one-tenth miles.

## VALLEJO SCHOOL BOARD PLANNING BOND ELECTION

\$450,000 Issue to Appear On  
Ballot; Will Set Date  
Soon

The Vallejo Board of Education this week voted to place a \$450,000 bond issue proposition on the ballot to finance new construction at four schools in the Vallejo Unified School District.

The board is expected to meet shortly to set a date for the bond election, it was announced.

Action on the school construction program has been held up while plans were being revised to meet the needs of the district. Last week Attorney General U. S. Webb solved a question of policy by ruling that it would be inadvisable for the Board to include a ten per cent preferential clause in favor of local contractors in specifications for new buildings.

Plans and specifications for buildings and additions are being prepared by Architect J. J. Donovan.

The Vallejo High School will receive \$107,000 for a new science building and equipment; \$73,000 for a girls' gymnasium; and \$20,000 for acquisition of property.

The Lincoln School will receive \$155,000 for a new building. At the meeting, the Board took a P. T. A. request asking that the auditorium be constructed to seat 750 instead of 350, under advisement.

### Lincoln School

The Curry School is slated to receive \$39,100 for an addition, and the Roosevelt School will be allotted \$23,300 to finance construction of larger quarters.

The proposed Lincoln School will have a classroom wing, an auditorium and a wing devoted to school administration offices. Plans allow for construction of additional facilities when attendance justifies them. Architect Donovan said. About 55,000 of the total allotment would be used for construction of temporary quarters to house Lincoln School pupils while the permanent buildings were being built.

# HOBSON'S CHOICE

There is no alternative, buildings MUST be artificially lighted.

Somebody is going to light the buildings you design, and that lighting can be friend or foe to the effect you wish to produce.

Lighting left to others or added as an afterthought may ruin the most perfect architectural effect, while lighting planned as an integral part of the structure will bring out lines and textures, tones and colors.

Lighting CAN be practical as well as aesthetically effective, but the combination doesn't just happen — it requires careful planning.

In planning, you have many things to consider. We are concerned only with the electrical service of which lighting is a part. We will be glad to check or help plan the details to assure the effect you want.

Estimated cost, \$9,237.86. **0**

#### TO ASK BIDS SHORTLY

GRAND COULEE, Wash.—The Bureau of Reclamation has announced that plans and specifications for work are being rushed by the Denver, Colorado, office of the Bureau for the completion of the dam, and it is hoped that bids will be called late in September or early in October.

The Bureau of Reclamation further announced that this project is principally a manufacturing and placement project and that there will be no excavating or site clearing, as that work was all completed in the previous contract. The entire dam is to be approximately 550 ft. high above bedrock, of which 200 ft. have been built, leaving approximately 350 ft. to be constructed. The manufacturing and placement of more than 6,500,000 c.y. of concrete will be included in the contract. The contractor will not be required to furnish the cement as the Government secures this under a separate letting. The processing of the aggregates is the job of the contractor. The contractor has the alternative of either setting up his own plant or buying the plant that is already on the site.

The above figures and estimates are approximate and subject to change when the specifications are issued.

The wage scale will be fixed under the Bacon-Davis act, but the basis of the wages has not, as yet, been determined.

## DISCHARGE PIPE BIDS SCHEDULED BY COMMISSION

**Proposals on Sunset Reservoir  
Discharge Line to Open  
October 20**

Bids for construction of the 9,400-foot, 60-inch discharge line of the new Sunset Reservoir yesterday were called for October 20 by the San Francisco Public Utilities Commission.

Bids were called also for laying a 16-inch cast iron main in Van Ness avenue between North Point and Bay streets. Bids will be opened October 13. The contract calls for laying about 450 linear feet of cast iron pipe.

Pipe and fittings for the Sunset discharge line will be furnished by the San Francisco Water Department. The contract calls for installing the pipe with fittings, valves, and other appurtenances only.

The contract is the last in the PWA-S.F.W.D. program which added two major pipelines, three reservoirs and more than 125 miles of city pipelines to the San Francisco water system.

### Connects With Others

The discharge line will run from the new Sunset reservoir down 28th avenue to Kirkham street, and down Kirkham street to Seventh avenue. There, it will connect with existing pipelines.

Principal items include: fabrication, lining and coating 9,570 ft. of steel pipe; excavation and backfill for normal trench not over eight feet below official street surface for 9400 feet of 60-inch pipe; 57,000 square feet of repavement; and 1100 square feet additional pavement removal and replacement.

The cost of the work is officially estimated to exceed \$200,000.

Bids will be opened on October 20, the same day as bids are to be opened for construction of the \$260,000 peninsula pipeline. The latter job involves construction of a pipeline to Palo Alto to carry Hetch Hetchy water to peninsula towns. Bids were called Sept. 29.

## ELECTRIC SYSTEM CONTRACT IS LET

SACRAMENTO, Sept. 29.—Award of the contract for construction of an electric distribution system at the army's \$7,000,000 air depot near here was announced today by the office of Maj. Arthur W. Parker, Constructing Quartermaster.

The contract was let to Scott-Buttner Elec. Co., 2214 Webster street, Oakland. It was announced. The contract price is \$52,595, the amount at which the firm recently submitted low bid for the project.

## PREPARE PLANS FOR COMPLETION OF COULEE DAM

**6,500,000-Yard Concrete Pour  
Ready for Bids in the  
Near Future**

Bids for completion of Grand Coulee Dam probably will be invited early next month, according to recent advice from the Pacific Northwest.

In Washington, D. C., officials of the Bureau of Reclamation reported that plans and specifications were being completed in the Denver office.

Site work and site clearing already is completed, and because the arrangement will furnish reagent which will be chiefly a "mass concrete and placement" project.

The dam has been erected to about 200 feet above bedrock, and because of the 100-foot additional height it will be needed to bring it to the full height of 550 feet above bedrock.

A large contractor will not have been selected for processing of aggregate, which is included in his contract, it is reported. About 650,000 cubic yards of concrete will be needed under the contract and the contractor advertising in the

## STATE INVITES BIDS ON FOUR HIGHWAY JOBS

**Proposals for Bridges, Grading,  
Paving, Surfacing Set for  
October 20-21**

SACRAMENTO, Sept. 28.—The State Highway Commission today authorized four Division of Highways contracts for advertising, with bids scheduled to open October 20 and 21.

Proposals for two of the contracts will be opened here October 20, and bids on the remaining two projects will be received the following day at the office of the State Highway Engineer in Los Angeles.

Projects placed on the market today are located as follows:

**San Joaquin and Sacramento counties:** Construction of two reinforced concrete slab bridges across Dry Creek about one mile east of Galt. One of the bridges will consist of seven 22-foot spans, one 15-foot span and two 7-foot 6-inch spans supported by reinforced concrete pile bents. The other will consist of thirty-four 22-ft. spans, five 15-foot spans and two 7-foot 6-inch spans supported by reinforced concrete pile bents. Bids will open in Sacramento Oct. 20.

**Inyo County:** Grading and surfacing with plant-mixed surfacing about seven and four-tenths miles of highway, between Diaz Lake and Alabama Gates. Bids will be opened in Sacramento October 20.

**San Bernardino County:** Grading and paving with asphalt concrete and Portland cement concrete about 19.3 miles of highway. The work is located between the Los Angeles county line and Colton. Bids will be opened at the State Highway Engineer's office in Los Angeles October 21.

**Los Angeles County:** grading and surfacing with plant-mixed surfacing and Portland cement concrete about three and two-tenths miles, between Encinal Canyon and Trancas Beach. Bids will be opened in Los Angeles Oct. 21.

## BIDS OCTOBER 27 ON SPAN ACROSS SUTTER BYPASS

State Highway Commission  
Sets Opening Dates on  
Four Projects

SACRAMENTO, Oct. 6. — The State Highway Commission today authorized for advertising four contracts for work on state highways, one project in Northern California and three in Southern California.

Bids will be opened October 27 and 28 in Sacramento and Los Angeles.

Projects authorized for advertising today are located as follows:

**Sutter county:** construction of a reinforced concrete slab bridge across Sutter Bypass about 12 miles west of Yuba City. The bridge will consist of one five and one-half foot span, one seven and one-half foot span, twenty-two 15-foot spans and 173 twenty-two foot spans on concrete pile bents. Bids will be opened in Sacramento October 27.

### Widening Bridges

**Los Angeles county:** widening bridges across Zuma Creek and Trancas Creek at points about 17 and 18 miles north of Santa Monica. Bids open in Los Angeles October 28.

**Riverside county:** grading and paving with plant-mixed surfacing about two and four-tenths miles between Beaumont and two miles south of the San Bernardino county line. Bids open in Los Angeles October 28.

**Orange county:** grading and paving with asphalt concrete and plant mixed surfacing about one-half mile on Tustin avenue at Seventeenth street. Bids will be opened at the office of the State Highway Engineer in Los Angeles October 28.

Malleable iron castings shipments during the first eight months of 1937 totaled 440,451 short tons, the Bureau of the Census reports, as compared with 358,488 short tons shipped during the corresponding period last year.

## Harney Submits \$110,316 Low Proposal For Nineteenth Avenue Reconstruction

Charles L. Harney, at \$110,316.90, yesterday submitted the low bid to Director William H. Worden of the San Francisco Department of Public Works for widening and reconstructing Nineteenth avenue from Sloat boulevard to Taraval street.

The job is the largest street project for which bids have been called by the Department of Public Works in recent months.

Charles L. Harney's bid on the principal item 190,000 sq. ft. of asphalt concrete pavement—was twenty-six cents per square foot. Fry Improvement Company, second lowest bidder at \$114,501.20, offered a price of twenty-seven cents per square foot on the same item. Other prices ranged up to thirty-four cents.

### Eaton & Smith Third

Third lowest bidder on the job was Eaton and Smith, at \$120,133.20, followed by Lowrie Paving Co., at \$122,933. Other bidders were: A. G. Raiser, at \$128,237.80, and Pacific Pavement Co., Ltd. at \$134,196.00.

The project will be financed with quarter cent State Highway funds.

Prices on thirty-three items were submitted in bids on the Nineteenth avenue project. Principal items include: 10,000 cubic yards of excavation; 13,000 cubic yards of borrow; 5,000 cubic yards of pavement excavation; 40,000 sq. ft. of 8-inch concrete pavement; 12,000 square feet of asphalt concrete pavement; 12,000 square feet of asphalt concrete track pavement; electrical work; relocating three hydrants; and a traffic control system.

### Traffic Bureau Job

The Bureau of Building Repair of the Department of Public Works at \$918.15, submitted the low bid for alterations to the Traffic Bureau in the City Hall. Second lowest bidder was Frank J. Reilly Co., at \$1411, followed by Braun-Kuhn Company, at \$1602.

Maddox & Peterson, at \$396, submitted the low bid for roofing a circular deck of the City Hall Dome. D. J. and T. Sullivan, at \$348, was the low bidder for moving two bungalows from the Sunshine School site to Samuel Gompers School.

## S. F. Plastering Contractors Busy As Work Resumes

Plastering work was resumed this week in San Francisco, apparently by means of an unofficial arrangement with hodcarriers. Negotiations between the Master Plasterers and the plasterers' union were completed last week, as previously reported, and work was in full swing on plastering jobs throughout the city Monday and yesterday.

Spokesmen for the hodcarriers' union were quoted as saying: "The men were receiving \$1.30 an hour.

Signing of an agreement at this figure was not approved by the employers, according to Wm. E. Hague, secretary of the Building Trades Employers' Association. Mr. Hague declared all jobs were being worked and that any differences between union and employers would in all probability be taken care of in the future.

"Plaster work is now going ahead," he said. "Any differences with the hodcarriers presumably will be satisfactorily settled at a later date."

Plastering contractors throughout the city were busy with work piled up during the recent strike, and there seemed no prospect of further cessation of activity in this field for the present.

Shipments of fire extinguishing motor apparatus during July, 1937, totaled 29 units, as compared to shipments amounting to 67 units for the same month in 1936, the Bureau of Census reports.

## S. F. FIRM BIDS \$484,507; TWO OTHER BIDDERS

**Kenney Electric, Radelfinger Bros. Also Submit Proposals**

Alta Electric & Mechanical Co., 467 O'Farrell street, San Francisco, yesterday submitted the lowest of three proposals to the San Francisco-Oakland Bay Bridge division of the State Department of Public Works for construction of catenary and feeders for the electric interurban railway system across the bridge.

Amount of the low proposal was \$484,507. The figure is an over-all total for work on the main bridge and San Francisco loop, and in the East Bay yard. All three bidders submitted figures for the entire project.

Other bidders, and their total proposals, were:

Kenney Electric Co., San Francisco, \$490,457.

Radelfinger Bros., San Francisco, \$519,650.

### Close Bidding

Close and consistent bidding on some individual items, and wide variance of figures on others, marked the proposals.

One electrical contractor present at the opening said this was due largely to the fact that there was "little room for guesswork" in the bidding schedule, the item arrangement being largely for payment purposes. He said differences in bids on single items were principally accounted for by the fact that some work was listed by one contractor under one item, and by a second under an entirely different item, the end result being practically the same.

### Extensive Program

Award of the contract for the trolley and feeder work will place under construction the major portion of the big job, which is to be completed late next year, allowing direct "commuter" railway service between San Francisco and East Bay points for the first time in history.

## MOUNTAIN CONSTRUCTION SUBMITS LOW BID FOR CALAVERAS GRADING

SACRAMENTO, October 13.—The State Highway Commission today opened bids on four contracts for roadwork aggregating \$223,180 in Mono, Kings, Inyo and Calaveras counties.

Thirteen bids were submitted on the largest contract, which called for grading and applying liquid asphalt to 6.1 miles of highway between San Andreas and two and one-half miles east of Valley Springs in Calaveras county.

Low bidder was Mountain Construction Company of Sacramento, at \$133,167.45. Second lowest bidder was Hemstreet and Bell, at \$137,381.70. Other bidders included: D. W. Thurston, \$139,011.30; Larsen Brothers and Harms Brothers, \$139,219.80; Louis Biasotti & Son, \$139,915.50; Earl W. Heple, \$140,608.70; and George Pollock, \$141,487.65.

### Kings Paving

Piazza and Huntley, San Jose, at \$62,648.50, submitted the low proposal on the second largest job for which bids were opened here today. The job involved paving 6.4 miles of highway with asphalt concrete between Alcorn Bridge Corner and Hanford in Kings county. Seven firms submitted bids.

The Mono county job involved about 2.2 miles of highway between Route 23 and June Lake.

Low bidder was J. V. Galbraith and Don A. Canaveri, Santa Rosa, at \$17,715.75; C. A. Baker, at \$17,937, submitted the second lowest bid, followed by Basich Brothers, at \$19,422.25.

### Other Bidders

Paulsen and March, Inc., Los Angeles, submitted the low bid on the smallest job for which bids were opened today. They bid \$9648 for applying penetration oil to 20.5 miles of existing roadbed between Panamint Sink and 1.1 miles east of Saline Valley Road in Inyo county. Basich Brothers, at \$10,256, submitted the second lowest bid. Other bidders were: Oilfields Trucking Company, at \$11,128; and J. B. Breen, at \$15,512.

The job involved 800 tons of liquid asphalt SC-2 penetration treatment. The low bidder's unit bid was \$12.60 per ton. Other unit bids, in the order of the total bid, were: \$12.82, \$13.91 and \$19.39.

## BIDS NOV. 8 FOR \$420,000 KERN SCHOOL

From Kern County last week came two bid calls for construction of a new Junior High School in East Bakersfield, estimated to cost \$420,000, and a grammar school addition in Wasco, estimated at \$60,000.

Bids for the new \$420,000 junior high school in East Bakersfield will be opened November 8. Plans for the plant were prepared by Architect Charles H. Biggar of Bakersfield and may be obtained from him upon deposit of \$25.

The proposed junior high school will consist of a Class A, two-story and basement classroom building with an auditorium to seat 1000 people, and a gymnasium.

The gymnasium will be of structural steel and reinforced concrete construction. The tile and composition roof will be of steel and wood construction. Steam heating facilities will be installed.

The job is one of the largest school projects proposed in Kern County for some time, although an extensive school construction program has been underway in the county for the past year.

Mark Falk of Los Angeles is the structural engineer on the project. Owner of the junior high school is the Kern County Union High School District.

The Wasco Union Elementary School District will open bids November 1 for construction of a two classroom unit, a cafeteria and a toilet building for the Wasco Grammar School.

Plans for the \$60,000 reinforced concrete addition were prepared by Architects Perrine and Mackie.

## LORD & BISHOP LOW BIDDERS ON DRY CREEK SPAN

**Bidding Close; Basich Bros.  
Low on Inyo Grading,  
Surfacing**

SACRAMENTO, Oct. 20.—Lord & Bishop, Sacramento, and Basich Bros., Los Angeles, today submitted low bids to the State Highway Commission on two contracts for work in San Joaquin, Sacramento and Los Angeles counties.

Lord & Bishop's grand total of \$66,602 was the lowest proposal received for construction of two reinforced concrete slab bridges across Dry Creek about one mile east of Galt, in San Joaquin and Sacramento counties.

The total is a combination of the firm's sub-total of \$52,652.50 and a proposal of \$15,949.50 on the alternative items calling for 7350 feet of cast-in-place concrete piles of the type not requiring mandrel, and driving 147 steel shells not requiring mandrels.

Campbell Construction Co., Sacramento, submitted a lower sub-total at \$51,298.50, and John Rocca's sub-total of \$52,237.50 also was lower than that submitted by Lord & Bishop. The addition of prices for alternative items submitted by these firms, however, would bring their grand totals above that of Lord & Bishop. Eleven bids in all were submitted for the bridge contract.

For grading and surfacing about seven and four-tenths miles in Inyo county, between Diaz Lake and Alabama Gates, Basich Bros. submitted a low bid of \$70,631.30.

### Oswald Bros. Second

Second and third low bidders, respectively, on the Inyo county project, were Oswald Bros., Los Angeles, at \$83,357.30; and Claude C. Wood, Stockton, at \$89,269.

A bidding range of more than \$70,000 was represented in the eight proposals received by the commission on the grading and surfacing job. High bidder was C. O. Sparks & Mundo Engineering Corp., Los Angeles, with a figure of \$141,468.90.

## Williams Bros. & Haas, Macco-Robertson Bid Utilities Commission Pipe Projects

Williams Brothers and Haas, Inc., at \$214,820.15, and Macco-Robertson, Ltd., at \$213,620, yesterday submitted low bids to the San Francisco Public Utilities Commission for laying the Sunset discharge main and constructing the Palo Alto pipeline, respectively.

The two contracts attracted a total of seventeen bids. Ten bids were submitted for construction of the Palo Alto pipeline, and seven for laying the Sunset discharge main.

Second lowest bidder on the contract for laying the 60-inch steel discharge main for the new Sunset Reservoir was Sibley Grading and Teaming Company, at \$219,840.25.

### Other Bidders

Other bidders were: MacDonald and Kahn Company, Ltd., at \$225,347.80; Barrett and Hilp, at \$228,829; Macco-Robertson, Ltd., low bidder on the Palo Alto pipeline, at \$230,954.50; Piombo Brothers, at \$235,261; and R. G. Clifford, at \$242,935.65.

The low bid of Macco-Robertson, Inc., on the Palo Alto pipeline job was less than \$3000 lower than Williams Brothers and Haas' second lowest bid of \$216,263.38. Third lowest bidder was Payton Brothers, at \$220,606.60.

Other bidders were: M. J. Lynch, at \$224,442; MacDonald and Kahn Company, Ltd., at \$259,952; R. G. Clifford, at \$268,700.20; S. D. Bechtel, at \$269,840; Union Paving Company, \$281,202.50; Lindgren and Swinerton, Inc., at \$303,147; and Eaton and Smith, at \$353,315.

### Pipe Prices Vary

It was noted that Williams Brothers and Haas, low bidders on the discharge main contract, submitted the highest figure on the principal unit, involving the fabrication, lining and coating of 9570 lineal feet of 60-inch steel pipe with single standard wrapping. Their price was \$14.28 per lineal foot. Other bids on the same unit were: Sibley Grading and Teaming, \$12.95; R. G. Clifford and MacDonald and Kahn Company, Ltd., \$13.65; Piombo Brothers and Barrett and Hilp, \$14; and Macco-Robertson, Ltd., \$13.85.

Director William H. Worden of the San Francisco Department of Public Works opened no formal bids at the meeting of the department yesterday.

Bids were called, to be opened November 3, for painting the Third Street Bridge over the Channel street waterway. The work is estimated to cost approximately \$2900.

### Contracts Awarded

Three contracts were awarded. To the Fay Improvement Company went the contract for the improvement of Twenty-ninth avenue between Pacheco and Quintara streets, at the bid price of \$19,337.29. The same company was awarded the contract for reconstructing Clarence Place northerly from Townsend street, at \$1651.

The J. W. Bender Roofing and Paving Company, at \$136, submitted the lowest bid for laying a tar and gravel roof over concrete slab on the Roosevelt Junior High School cafeteria. Second lowest bidder was the firm of Malott and Peterson, at \$158.

## Fresno Exchange Elects Officers

Charles G. Connors, president of Kyle & Co., this week took office as president of the Fresno Builders Exchange, following his election at the annual membership meeting. He succeeds J. M. Brown who served for two years as president.

Harry Cayford, secretary-manager of the Fresno exchange for the past ten years, was re-elected. Other officers elected include J. C. Ferger, vice-president; M. W. Hancock, re-elected treasurer.

New directors are J. M. Brown, T. C. Irwin, Joseph Masi, Charles W. Stewart, H. G. Rohr, T. A. Osborne, B. A. Newman and T. H. Curry.

## STATE INVITES BIDS ON SPANS, GRADING, PAVING

### Four Contracts Authorized for Advertising by Highway Commission

SACRAMENTO, Oct. 19.—Four State Division of Highways contracts, three for work in Northern California and one for a Southern California paving job, were authorized for advertising today by the State Highway Commission.

Bids on the Northern California work will be opened in Sacramento November 10, and on the remaining contract November 12 in Los Angeles.

Contracts placed on the market today involve work in the following counties:

**Sutter**—Grading and surfacing with plant-mixed surfacing (medium curing type) on crusher run base about four and seven-tenths miles. The project is located between Tarke and one mile south of Sutter City. Bids will be opened in Sacramento November 10.

**Mendocino**—Construction of a reinforced concrete girder bridge across Elk Creek about 15 miles north of Point Arena. The bridge will consist of one 50-foot span and two 35-foot spans on concrete piers and abutments with pile foundations. Work also includes grading and applying penetration oil treatment to about three-tenths of a mile of highway. Bids will be opened November 10 in Sacramento.

**Mendocino**—Construction of a reinforced concrete bridge across Jughandle Creek about five miles south of Fort Bragg. This bridge will consist of 16 slab spans having a total length of 388 feet. Spans will be supported by an open spandrel arch and concrete bents. Grading and applying asphalt treatment to about three-tenths of a mile of highway also is included in the contract, for which proposals will be received in Sacramento November 10.

**Los Angeles**—Grading and paving with Portland cement concrete and plant-mixed surfacing about one and two-tenths miles of highway. Location of the project is between Valley Boulevard and Las Tunas drive. Bids will be opened November 12 at the office of the State Highway Engineer in Los Angeles.

### MOHRDICK ELEC. CO. TAKES NEW QUARTERS

In order to better serve their customers, Mohrdick Electric Co., formerly located at 439 Clementina Street, has taken new and larger quarters at 947 Folsom Street. The new telephone number is EXbrook 7021.

Lack of space and the need of a more prominent location are given as the principal reasons for the move, by the Mohrdick Electric Company.

## Oakland Chamber Sees Intensive East Bay Building Activity; Survey Report Issued

An era of building activity, as intensive as that of 1922, is forecast for Metropolitan Oakland by Chamber of Commerce officials.

The prediction was drawn from a report issued by the Research and Statistical Department of the Oakland Chamber covering the first nine month period of 1937.

Fifteen years ago, when the last building boom was starting, there were 73,381 water meters installed in metropolitan Oakland, of which 71,500, or 97.6 per cent, were in use. Today there are 133,495 water meters installed in metropolitan Oakland and 130,385, or 97.67 per cent, are in use.

It was pointed out that only 2.33 per cent of all the usable buildings in metropolitan Oakland are vacant and that 8747 more buildings, of all types, are occupied now than were occupied in 1937. This occupancy is at the rate of 2918 structures each year.

### New Families Gain

The increase in the number of new families arriving in metropolitan Oakland during the first nine months of 1937, as compared with the same period a year ago, further substantiates the new building era forecast, according to the chamber.

During the 1937 period 1224 new families arrived in metropolitan Oakland to make their home, as compared with 825 for the same period a year ago.

Of the number arriving here this year, 388 families were from out of the state and 836 were from other cities in California. During 1936, 230 came to metropolitan Oakland from other states and 595 were from other California cities.

The nine months' report further reveals that there has been an increase of 4.1 per cent in advertising lineage over the same period of last year and that air transport passenger travel at the Oakland airport has risen 6 per cent during the time.

### Building Permits Up

Bank debts have increased 17.4 per cent and the value of residential building permits in Oakland has climbed from \$2,583,467 to \$3,356,789. During the same period the number of permits issued increased 38.7 per cent.

Business failures have decreased 11.9 per cent. Carloads of freight moved in and out of Oakland switching district gained 15.1 per cent and express shipments handled in the Oakland district show an increase of 6.9 per cent.

The number of persons employed in metropolitan Oakland factories has increased 15.9 per cent over last year and the amount of payroll has gained 40.3 per cent during the same period of time.

### Incoming Cargo

Incoming cargo in the harbor shows a gain of 5.4 per cent, with the total incoming and outgoing activity increasing 2 per cent during the nine-month period.

### POURING COMPLETE AT O'SHAUGHNESSY

The San Francisco Public Utilities Commission this week announced that pouring of concrete on the \$4,300,000 project involving raising O'Shaughnessy dam has been completed.

An annual increase in revenue of \$225,000 is expected to result from the increased storage capacity of the dam made possible by raising the structure from 344 to 430 feet. Utilities officials said. Raising the dam has resulted in an increased storage capacity of fifty billion gallons, from 67 to 117 billion gallons, a gain of seventy per cent.

## Start Revised Study Of Drainage Basins

WASHINGTON, D. C., Oct. 18.—Forty-five drainage basin committees, composed of members designated by governors and chairmen of state planning boards, together with field representatives of federal agencies, have begun a revision of the Report on Drainage Basin Problems and Programs submitted by the National Resources Committee at the close of 1936.

These drainage basin committees covering the whole country, have been organized through the regional offices of the National Resources Committee, and their reports will be co-ordinated by the Water Resources Committee in Washington.

Meeting of the drainage basin committees have already begun and will continue during the next six weeks.

During September, this year there was an increase of 4.2 per cent over the same month a year ago in the number of new business firms locating in metropolitan Oakland. Post office receipts gained 13.4 per cent this year over last and realty transfers show an increase of 10.6 per cent. A gain of 5 per cent in retail trade in Oakland department stores is shown in the report.

Street car and motor coach passengers increased 1.9 per cent during the nine-month period and telephone stations in service in metropolitan Oakland continue to show a monthly gain of 9 per cent over the same month a year ago.

**BIDS WANTED**  
**SAN MARINO**, Los Angeles Co., Cal.—Until November 10, 8:00 p. m., bids will be received by the San Marino City Council, E. E. Kerr, City Clerk, for constructing sanitary sewers, under 1911 Act, as follows:

California Street, Greenwood and other streets, involving 2310 lin. ft. 8-in. vit. sewer, misc. manholes, flush tanks, etc.  
 Winston Street and other streets, involving 240 ft. 8-in. vit. sewer and identical items.  
 Plans and specifications may be obtained from the office of Harold Barnett, Braley Bldg., Pasadena, upon deposit of \$5 each set. Certified check or bond, 10%, must accompany each proposal.

**PROPOSED**  
**SAN DIEGO**, Calif.—City Engineer H. W. Jorgensen has announced the approximate cost of the proposed citywide sewer system at \$3,539,324 in a preliminary report filed with the office of City Manager Robert H. Allen. The estimate includes the cost of a trunk sewer from Kurtz St. and Barnett Ave around the bay to a proposed treatment plant at the foot of Thirty-second St., a sewer from East Point Loma to Kurtz and Barnett Aves., new sewers at Pacific Beach and La Jolla and various other points within the city where sewers now are overlaid.

The treatment plant is estimated to cost \$750,000. The total cost of the bay-side sewer and the treatment plant would be \$1,895,578. The cost of necessary renewals, extensions and additions to existing sewer systems to relieve present inadequate trunk lines, eliminating septic tanks and provide proper sewage through-out the city would be \$1,613,748. This would include an item of \$313,000 for the Pacific Beach and La Jolla sewer system, not now properly sewered, and \$80,000 for a treatment plant in Rose Canyon. The sewer around the bay is estimated at \$966,115, while the East Point Loma sewer at \$178,463. The bay sewage plans include a pump plant at Kurtz St costing \$18,727 and a pump plant at the foot of Beardsley St to cost \$68,067.

The sewer around the bay front as planned is about 8 miles long and consists of pipe ranging from 75 inches in diameter to 24 inches. The East Point Loma sewer would be about 3 miles long, the pipe would range from 10 to 24 inches. Other sewers are to be constructed at the following costs: West Point Loma, \$242,000; Morena, \$61,600; Mission Valley, \$335,567; Chollas Valley, main line \$211,818; Chollas Valley, west branch, \$514,819; South Chollas Valley, \$112,250; South Chollas branch, \$20,856; Valencia Park, \$51,899.

## GUY F. ATKINSON NAMED TO HEAD A. G. C. IN 1939

### S. F. Contractor Elected First Vice-President, to Become President Next Year

San Francisco will be the convention city of the Associated General Contractors of America in 1939, "Exposition Year."

On motion of Floyd O. Booe, secretary-manager of the Northern California chapter of the organization with headquarters in this city, "The Men Who Are Building America," at their annual convention in Atlantic City, N. J., had yesterday voted approval.

In addition and to give the occasion an all-San Francisco savour—on Booe's motion the convention elected Guy E. Atkinson, prominent general contractor of this city, first vice-president for 1938, from which office he will automatically rise to president in 1939.

#### Wire From Booe

News that the delegates and members of their families to the number of approximately 4000 will come to San Francisco and the Golden Gate International Exposition in 1939 was contained in a telegram from Secretary-Manager Booe received at the local office of the organization yesterday.

Booe flew to the convention last Tuesday on a T. W. A. transcontinental plane in a last-minute dash to bring the convention here during the exposition.

Atkinson is president of the Guy F. Atkinson Company, Inc., of San Francisco, at present associated with Mason, Walsh, Atkinson, Kier Company in building the first \$60,000,000 unit of the \$350,000,000 Grand Coulee Dam project. When President Roosevelt on his cross-nation tour visited there recently Atkinson was host at a banquet in his honor.

Distillate oil burner shipments in August, 1937, numbered 55,071, as compared with 33,845 in the preceding month and 49,847 in August last year, according to census bureau statistics.

### VISALIA STORE BID DATE SET

Bids for construction of the \$80,000 Montgomery, Ward & Co. store in Visalia will be opened at the company's Chicago offices November 9, it was announced this week. Plans for the work are being figured by a selected list of contractors.

The building will be one-story in height, of Class B construction, and will contain approximately 36,000 square feet of store space. It will have a basement and a mezzanine floor. Plans are by Montgomery, Ward engineering department.

## STATE TO OPEN BIDS NOV. 7 FOR OVERPASS

SACRAMENTO, Oct. 26.—Continuing its program of grade separation construction, the State Highway Commission today authorized for advertising a contract for constructing an overpass in San Luis Obispo county.

Bids on the contract, only work placed on the market by the Commission today, will be opened in Sacramento November 17.

The overhead crossing will carry the state highway over the Southern Pacific tracks about six miles north of San Luis Obispo.

It will be a reinforced concrete girder structure having a total length of approximately 470 feet.

The overpass will consist of two 59-foot spans, two spans 50 feet three and seven-eighths inches in length, four spans 45 feet four inches long, and two spans 32 feet six inches in length.

Principal items on which contractors will submit figures include: 2700 cubic yards structure excavation; 413 pounds bar reinforcing steel; 2300 cubic yards Class A Portland cement concrete in structure; 16,000 pounds miscellaneous steel; 40 feet of 8-inch corrugated metal pipe; 80 feet of 18-inch corrugated metal pipe; and one spillway assembly.

## BIDS SCHEDULED ON HIGH SCHOOL AT FORT BRAGG

### Proposals on \$181,000 Project Will Be Opened November 19

Bids for construction of the Fort Bragg High School have been invited by the Fort Bragg Union High School District, according to Superintendent of Schools Paul C. Ryan.

Bids will close November 19 at 8:00 P. M., and will be opened at 8:15 P. M. in Mr. Ryan's office, 500 Harold street, Fort Bragg.

The school, according to estimates filed with the Public Works Administration, will cost approximately \$181,800. Toward this estimated total the PWA has allotted a grant of \$87,810, and the balance of necessary funds will be supplied by the district.

The high school will be a one-story frame structure with steel trusses. It will contain 19 classrooms, a cafeteria, offices, and a gymnasium and auditorium. Foundations will be of reinforced concrete. The building will have composition roofing.

Plans for the building were prepared by Architect W. E. Coffman of Sacramento, with F. W. Kellberg of San Francisco as structural engineer.

In announcing its grant allotment, a PWA report declared the new structure necessary because "the existing building is in a deplorable condition, absolutely unfit for educational purposes, and should be abandoned as soon as possible." The grant was one of 648 allotted in August to projects for which bond elections were held prior to the final two-year extension of PWA.

### FURNITURE ORDERS GAIN

New orders for steel office furniture received during the first eight months of 1937 totaled \$17,874,874, as compared to orders amounting to \$12,401,885, taken during the same period in 1936, the Bureau of Census reports in its monthly bulletin.

## BIDS SOON ON GYMNASIUM AT LOWELL HIGH

**Plans for Structure Completed; Open Junior College Test Boring Bids**

Indications that a \$1,394,000 school construction program will be underway in Northern California soon came yesterday as Acting Director Sid J. Hester of the San Francisco Department of Public Works announced that bids would be called for construction of a boys' gymnasium at Lowell High School "within two weeks."

The Lowell gymnasium was the second major San Francisco school project slated for immediate construction during the past week by local authorities.

Bids were opened yesterday at the Department of Public Works meeting for boring ten test holes on the site of the proposed San Francisco Junior College, first step toward actual construction of the \$693,000 initial unit of the junior college which City Architect Charles H. Sawyer last week announced should be underway by the first of the year.

### Test Boring Bids

Low bidder for digging the test holes was William Allingham Company at \$1.20 per hole. The only other bidder was Robert Garcia, at \$2.00.

Other Northern California school projects are: the \$85,000 Santa Clara High School gymnasium for which bids will be opened November 16; the \$153,225 Porterville High School for which bids will be opened November 19; the \$125,455 Watsonville Union High School gymnasium and pool, plans for which were approved last week by PWA officials, and the \$181,800 Fort Bragg High School on which bids open November 19.

Plans and specifications for the Lowell High School boys' gymnasium have been completed, according to City Architect Charles H. Sawyer.

The structure will cost approximately \$147,000 and will measure 72 by 93 feet in size. The gymnasium will be designed for the use of boys only and will contain shower and locker rooms as well as athletic floors. When funds are available a girls' gymnasium will be erected adjacent to the boys' gym to form a boys' and girls' gymnasium in one building, Mr. Sawyer said.

### Concrete Walls

The structure will be a regulation gymnasium, according to Mr. Sawyer. Walls will be of reinforced concrete. The composition covered roof will be supported on steel, and roof trusses will be of steel. The building will be finished in brick and terra cotta.

All plans and specifications were prepared in the office of the city architect.

## Banks to Represent Interior Department On Advisory Board

Secretary of the Interior Harold L. Ickes yesterday announced the appointment of Frank A. Banks, Construction Engineer of the Bureau of Reclamation in charge of the Grand Coulee Dam Project on the Columbia River, as the representative of the Department of the Interior on the Advisory Board of the administration of the Bonneville project.

Secretary Ickes on October 11 announced the appointment of James Delinage Roos an Administrator of the Bonneville Project.

The Act establishing the Bonneville Dam administration provided for an Advisory Board to consult with the administrator and to be composed of a representative designated by the Secretary of War, a representative designated by the Secretary of the Interior, a representative designated by the Federal Power Commission and a representative designated by the Secretary of Agriculture.

### Bureau Veteran

Mr. Banks has been in charge of Grand Coulee Dam since it was commenced in 1934. He was born in Saco, Maine, in 1883; graduated from the University of Maine, with a degree of Bachelor of Science in Civil Engineering, in 1906, and has been employed continuously by the Bureau of Reclamation, Department of Interior, since that year.

Mr. Banks is thoroughly familiar with conditions in the Pacific Northwest, since he has been employed there for many years.

He was Construction Engineer in charge of the American Falls Dam in Idaho from 1920 to 1927, and Construction Engineer of the Owyhee Dam in Oregon from 1927 until work was begun on the Grand Coulee Dam.

## WALL BOARD MATERIAL LISTED BY CELOTEX

The Celotex Corporation announces that it is now manufacturing Cemesto, a new product composed of an insulating core of celotex, surfaced on one or both sides with fire-resistant asbestos-cement.

The Celotex Corporation recommends Cemesto for interior and exterior wall construction for factories, homes, garages, filling stations, cabins, vent ducts, spandrels, and for industrial drying and conditioning rooms. It may be used also as a flat roof surface for industrial buildings, the company announces.

Cemesto is manufactured in panels four feet wide and from six to twelve feet long. It comes in four thicknesses of Celotex, from one-half to two inches, surfaced on one or both sides with one-eighth-inch layers of asbestos-cement.

## BIDS NOV. 18 ON WASHINGTON JETTY PROJECT

**U. S. Engineer Office \$1,500,000 Job at Columbia River Entrance**

Captain S. L. Damon, District Engineer of the U. S. Engineer Office, Portland, yesterday issued a call for bids, to be opened November 18, for construction of a \$1,500,000 jetty improvement project at the north side of the entrance to Columbia River, Pacific County, Washington.

The sum of \$460,000 has been allotted for the start of the project, and it is expected that the balance will be appropriated by Congress by June 30, 1938. The initial allotment will finance construction until that date, it is believed.

The work is located on the north side of the entrance to Columbia River. The nearest community to the site is Ilwaco, Washington.

### Repairing Jetty

Roughly, the work involves repairing the north jetty and constructing a spur jetty, tramways and land trackage, and furnishing and placing about 470,000 tons of jetty stone, and 1700 cubic yards of cement concrete.

A single track standard gauge wharf approach tramway approximately 1504 feet in length will be constructed from the backwall toward the contractor's unloading plant. Nine thousand two hundred feet of standard gauge land trackage and sidings are to be constructed. Next, 15,500 feet of standard gauge jetty approach and end-rocketment tramways are to be built.

In addition, the contractor will furnish materials and construct a suitable foundation and pit, and install a 100-ton standard track scales to be furnished by the United States. Cement concrete blocks will be constructed at the outer end of the repaired north jetty.

### Principal Items

Principal items include: 35,000 cubic yards embankment; 20,000 cubic yards excavation; 82,000 lineal feet Douglas fir piling; 52,000 pounds railroad spikes; 700 tons of steel rails; 43,000 lineal feet wire cable; 20,000 pounds tie plates; 470,000 tons of stone; and 12,000 pounds of concrete anchor chains.

Prices are to be submitted on 24 units, according to Captain S. L. Damon.

The terminal will consist of a 1700-ton block, 46 feet long by 130 feet wide by 16 feet high. It will be surrounded by ten smaller blocks, each weighing 170 tons, anchored by heavy chains to the large blocks.

A secondary jetty about one mile long will be constructed southeast of Cape Disappointment to help stabilize the entrance channel, according to the U. S. Engineer Office.

## LOWRIE PAVING LOW ON OCEAN AVE. CONTRACT

City Departments Get Bids for  
Five Projects in a  
Quiet Day

The San Francisco Department of Public Works and the Public Utilities Commission yesterday opened bids on five contracts calling work costing approximately \$36,261, in the aggregate.

Hamilton Morton, Jr., at \$10,750 submitted the low bid to the Public Utilities Commission for paving with riprap around the spillway and inlet tower near the easterly end of San Andreas Dam in San Mateo county. Other bidders were: William O. Tyson, at \$11,450, and W. J. Tobin, at \$31,525.

Bids on four jobs were opened, but no bid calls were issued, by Director William H. Worden at the regular Wednesday meeting of the Department of Public Works.

### Ocean Avenue

The Lowrie Paving Company, at \$20,035 submitted the low bid for reconstruction of Section C of the Ocean Avenue Improvement Project, running from Pinehurst way to Junipero Serra boulevard. The second lowest bidder was Eaton & Smith, at \$20,123.

Other bidders were: Pacific Pavements Company, Ltd., at \$21,147; Pacific States Const. Co., at \$21,177.50; Charles L. Harney, at \$21,550; A. G. Raisch, at \$21,885; The Fay Improvement Co., at \$22,440.50; and M. J. Lynch, at \$23,384.

Other low bidders on Works Department jobs were: Hanson Bros. at \$3495, on moving buildings at Aquatic Park; D. E. Burgess, at \$1665, on painting the Third St. bridge; and Anchor Post Fence Co. at \$516, on installing two sets of wrought iron gates at Raphael Weill school.

Shipments of fire extinguishing motor apparatus totaled 560 units during the first eight months of 1937, as compared to shipments of 425 units during the same period in 1936, the Bureau of Census announces.

## \$50,000 BEQUEST FOR PLAYGROUND

Among the numerous bequests of the late William W. Carson, San Francisco lumber magnate who died last week, was a gift of \$50,000 to the city of Eureka for the establishment of a playground or community center, the filing of his will here this week revealed.

What plans will be made by the city for expenditure of the money was not known yesterday. Formulation of plans probably will be contingent upon knowledge of when the funds will become available for such construction as may be decided upon.

## Plan \$440,000 Work At Oakland Harbor

An urgent request from the Oakland Port Commission that some \$300,000 in harbor bonds be sold immediately in order to allow needed construction had been referred yesterday by the city council to City Manager Hassler.

Heading the list in "immediacy" of the planned projects is improvement of and addition to the Ninth avenue pier, for which a federal grant of \$72,225 has been allotted. This work must be started by December 13, or the grant will be lost, the commission reported. The project would cost \$160,000.

Other work planned includes construction of a hangar at Oakland municipal airport, \$180,000; opening and improvement of Maritime street from Fourteenth to the new bridge overpass; enlargement of airport runways, \$100,000; and purchase of needed property, \$5,000.

The 400-foot Spire to the Sun of San Francisco's 1939 World's Fair will be lighted with intense white on the outside, a rose red within.

Shipments of steel shelving during August totaled \$491,105, as compared to shipments amounting to \$419,781 during the same month in 1936, the Bureau of Census announces.

## BIDS RECEIVED BY COMMISSION ON THREE JOBS

\$459,000 Low Proposals Submitted On Highway Work In Four Counties

SACRAMENTO, Nov. 3.—Low bids aggregating more than \$459,000 were submitted to the State Highway Commission today on 3 State Division of Highways contracts for work in San Joaquin, Sacramento, Humboldt and Mendocino counties.

Hemstreet & Bell, 501 Eleventh street, Marysville, at \$226,636 submitted the lowest of eight bids for grading and surfacing about two and nine-tenths miles in Humboldt county, between Myers and Stegemeyer bluff.

Second and third low bidders, respectively, were N. M. Ball Sons and D. McDonald at \$232,549, and Poulos & McEwen at \$232,635.

### Paving Contract

Fredericksen & Westbrook, Lower Lake, submitted a low proposal of \$205,803 for grading and paving about five miles in San Joaquin and Sacramento counties, between Jantant Corner and one mile north of Galt.

David H. Ryan, San Diego, at \$209,428, and N. M. Ball Sons and D. McDonald at \$212,313, were second and third low bidders, respectively.

For grading about one and six-tenths miles in Mendocino county, a low bid of \$27,245 was submitted by A. R. Maestretti, 318 Elks Bldg. Stockton.

Second and third low bidders for this contract were Young & Son Co., Ltd., Berkeley, at \$27,906; and Guerin Bros., San Francisco, with a proposal of \$29,317.

### "BLACK LIGHT"

Invisible "Black Light" acting on fluorescent paint will be one of the unusual color features to be incorporated in the scheme of the architectural decoration at the 1939 Golden Gate International Exposition, according to Fair officials.

## CITY ASKS BIDS FOR CONNECTING SEWER CONTRACT

Proposals Nov. 24 on Final Job In PWA Disposal Program

Action on construction of the last leg in the PWA-San Francisco Department of Public Works sewage disposal program, financed by a federal grant and the sewer bond issue of 1933, loomed Wednesday as Director Wm. H. Worden issued a call for bids for construction of the Richmond connecting sewer in Golden Gate Park.

Bids will be opened for the \$36,000 project, November 24.

The Richmond sewer will connect the Richmond Sewer Tunnel, now under construction, and the Richmond - Sunset Sewage Disposal Plant. The sewer will be composed of reinforced concrete pipe and will be about 1700 feet in length. It will connect with the Richmond Sewer Tunnel at Forty-sixth Ave. and Fulton street, and cut across Golden Gate Park to the treatment plant located north of the South Drive, opposite the intersection of Forty-sixth avenue and Lincoln way.

### Sewer Tunnel

The Richmond Sewer Tunnel, being constructed by MacDonald and Kahn Company, Ltd., is approximately 85 per cent completed, according to engineers' reports. The Richmond - Sunset Sewage Treatment Plant was started October 4, and is expected to take one year to complete. Construction of the connecting sewer is expected to take about four months.

Plans and specifications for the entire project were prepared in the office of City Engineer John J. Casey.

Eleven firms submitted bids for repairing the Evans Ave. Bridge at the weekly meeting of the Department of Public Works Wednesday, although it was the third largest job for which bids were opened by Director Wm. H. Worden.

### Eaton & Smith Low

Low bidder was Eaton & Smith, at \$3966. Other bidders included: Peter Sartorio, \$4719; Fred J. Early, Jr., \$4940; Healy-Tibbitts Con-

## Hemstreet & Bell, Rocca, Maurer Submit Low Proposals on State Bridges, Grading

SACRAMENTO, Nov. 11.—Low bids aggregating approximately \$218,000 for construction of three State Division of Highways contracts in Mendocino and Sutter counties were under consideration here today.

Hemstreet & Bell, Marysville, yesterday submitted the lowest of eleven proposals for grading and surfacing about 4.7 miles in Sutter county, between Tarke and one mile south of Sutter City. Amount of the low bid was \$133,596.

### GOV'T BUILDING ARCHITECT NAMED

Architect Timothy L. Pfeuger of San Francisco has been appointed consulting architect for the United States government's \$500,000 exposition building, to be constructed on Treasure Island for the 1939 Golden Gate International Exposition, according to press dispatches from Washington, D. C.

Advices from the east said that appointment of Mr. Pfeuger as consulting architect was announced by Rear Admiral Christian J. Peoples, director of the Treasury Department procurement division. The building will house federal exhibits at the 1939 world's fair.

struction Co., \$4941; C. C. W. and H. H. Hann, \$5190; Barrett and Hilp, \$5375; E. J. Treacy, \$5605; Frank J. Reilly Co., \$5852; Department of Public Works, Bureau of Building Repair, \$6090.54; A. W. Kitchen and Co., \$751.40, and J. C. O'Leary, \$7660.

The Soule Steel Company, at \$13,431, submitted the only bid for construction of the Bureau of Identification Pent House at the Hall of Justice, largest job for which bids were opened Wednesday.

M. E. Vukicvich, at \$10,491, submitted the low bid for completion of eighteen rooms at Lawton School. Seven firms submitted bids on the job. Other bidders included: Frank J. Reilly Co., \$10,931; Anderson & Ringrose, \$10,968; Adam Arras and Son, \$11,424; Monson Bros., \$11,848; Peter Sartorio, \$12,124, and Grant - Martinelli Const. Co., \$12,124.

## STATE INVITES BIDS ON FOUR HIGHWAY JOBS

**Bids on Redding Underpass,  
Kern Paving Scheduled  
For December 1st**

SACRAMENTO, Nov. 9.—Bids on four highway and grade separation jobs in Shasta, Kern, Orange and Los Angeles counties today were called by the State Highway Commission. Bids on the two Northern California projects will be opened in Sacramento, December 1; the others will be opened in Los Angeles, Dec. 2.

The first contract calls for grading and paving with asphalt concrete about 19.1 miles of highway between one mile north of Grapevine Station and ten miles south of Bakersfield, in Kern county.

Principal items include: 247,000 cubic yards of unclassified excavation; 23,000 station yards overhaul; 245,000 square yards of preparing subgrade; 1870 tons of liquid asphalt of various grades; 16,500 tons of mineral aggregate plant mix surfacing; 77,650 square yards of preparing, mixing and shaping shoulders and road approaches; 3,475 tons of asphaltic cement, grade E asphaltic concrete; 34,000 pounds of bar reinforcing steel; and 3084 lineal feet of CMP.

### Redding Underpass

The other Northern California job for which bids will be opened in Sacramento, December 1, involves construction of an undergrade crossing under the tracks of the Southern Pacific Railroad near Redding in Shasta county.

The contract also calls for grading and paving with Portland cement concrete and crusher-run base and road mix surfacing about 0.79 mile of roadway.

Principal items include: remove and dispose of 1,250 cubic yards of existing concrete pavement; 48,000 cubic yards of unclassified excavation; 6500 cubic yards of structural excavation; 84,000 sta. yds. overhaul; 138,000 pounds of bar reinforcing steel; 2,881 cubic yards of class A Portland cement concrete; 965,000 pounds of structural steel; 95,000 pounds of cast steel, and 67,000 pounds of wrought iron plate.

### Orange Grading

Bids will be opened December 2, in Los Angeles, for construction of drainage structures, excavating ditches and grading 2.4 miles of road approaches between Bitter Point and the north arm of Newport Bay in Orange county.

The contract also calls for applying penetration oil treatment to the graded roadway.

Principal items include: 4500 cu. yds. of unclassified excavation; 4,600 cu. yds. of structural excavation; 27,000 pounds of bar reinforcing steel; 3000 lbs. of steel rail assemblies; 9000 pounds of

## 1939 Fair Exhibit Head Reports Many Displays Planned

Back in San Francisco after a three-week tour of the United States in the interests of the Golden Gate International Exposition, F. M. Sandusky, director of exhibits for the Exposition, was enthusiastic over the 1939 Fair prospects.

"Wherever I went in the East I found business men's eyes turned toward the Pacific Coast," said Sandusky, "and almost all intend to be represented with exhibits at the West's 1939 Exposition."

Sandusky left here three weeks ago for Chicago, Detroit, Akron, and New York for the purpose of opening negotiations with a number of larger exhibitors. His trip, he said, was successful from the point of view of obtaining definite promises of exhibit participation.

"The western territory, I was told, is the nation's fastest growing market," said Sandusky, "and every industry, business, or enterprise with expansion in view thinks first of the territory west of the Rockies."

"The 1939 San Francisco Exposition, therefore, is the focal point of this interest and serves to dramatize, at a minimum of expense, the richness of this western market and its demand for merchandise offered by concerns with national distribution systems."

## State Contractors' Directory Printed

SACRAMENTO, Nov. 7, 1937.—The State "great register" of construction contractors for the fiscal year ending June 30, 1938, is off the State printing plant, it is announced by Registrar of Contractors Earl S. Anderson. The directory is the alphabetical section of a double directory service published annually by the Registrar of Contractors, which consists of both an alphabetical and geographical directory.

miscellaneous iron and steel; and 1520 lineal feet of 36-inch standard reinforced concrete pipe.

### L. A. Project

On the same day bids will be opened in Los Angeles for construction of drainage structures and grading and paving with asphalt concrete the intersection of Firestone boulevard and Santa Fe avenue in Los Angeles county.

Unit prices will be submitted on ten items. Principal items include: 190 cubic yards of structural excavation; 1400 tons of asphaltic concrete; 12,500 pounds of bar reinforcing steel; 55,500 pounds of steel rail assemblies, and 21,000 pounds of miscellaneous iron and steel.

## FEATHER RIVER P. G. & E. DAM PLAN MODIFIED

**Three Dams Now Proposed;  
Firm Agrees to Relocate  
Cresta Structure**

The number of dams to be constructed under plans of the Pacific Gas & Electric Company's proposed generating expansion program has been reduced to three, Vice-President Paul Downing of the utility company reported to the State Department of Public Works this week.

The firm has decided to build only three dams instead of the originally projected six, and will absorb all power generated as a result of its Feather River program, the official reported, following a meeting with state officials.

State Director of Public Works Earl Lee Kelly previously had declared the department would not object to the company's plan if it were demonstrated that no damage to state highways will result, and that power production will not interfere with plans for selling power generated at Shasta Dam, which the Federal Bureau of Reclamation will construct near Redding.

### Dam Locations

Mr. Downing reported that the plans now called for construction of dams at Cresta, Fulga and Poe.

It has been agreed to relocate the Cresta power house near Grizzly Dome in order to avoid any flooding of tunnels on the adjoining state highway, according to officials.

Mr. Downing said the dams will be finished before power developed at Shasta will be available. The P. G. & E. application now is pending before the Federal Power Commission.

## Examination Dates Postponed by Board

The date for examinations for certificates to practice architecture in California, previously scheduled for December 6, 7, 8, and 9, has been changed to December 13, 14, 15 and 16, according to Secretary Harry J. Devine of the State Board of Architectural Examiners, Northridge District.

The examinations will be held in Architectural Building at the University of California in Berkeley.

Registration fee, according to Mr. Devine, is \$15, and must be filed at the San Francisco office of the board not later than November 22. Further details may be secured from the board office, room 503, State Building Annex, 450 McAllister street, San Francisco. The telephone number at the board office is Underhill 8700, Local 315.

## SCHEDULE BIDS ON COMPLETION OF COULEE DAM

**Bureau of Reclamation to Open  
Proposals in Spokane  
December 10**

Bids for completion of Grand Coulee Dam and power plant will be opened at the Reclamation Bureau's Spokane, Wash., office December 10, it was announced this week.

One of the largest construction contracts ever advertised by a U. S. government agency, the project will bring the dam to its full height.

Work included in the new contract will involve manufacture and placement of 5,800,000 cubic yards of concrete, more than 1,500,000 cu. yds. in excess of the total volume of concrete which went into Boulder Dam. It included placement of about 158,000,000 pounds of steel in the permanent structure, as follows: 50,000,000 pounds of gates, and operating devices; 50,000,000 pounds of reinforcement steel; 10,000,000 pounds of pipe and fittings; 24,000,000 pounds of trash-rack metal work; 16,000,000 pounds of penstock metal work; 8,000,000 pounds of cranes and miscellaneous metal work. It also includes about 340,000 cubic yards of excavation.

### 1,460 Days Allowed

Despite the fact that the mass of masonry to be placed under the contract greatly exceeds that which went into the construction of the Great Pyramid of Egypt, the successful contractor will be allowed only 1,460 calendar days to complete the job after he is notified by the Bureau to proceed.

Bidders will be required to be prepared to post a performance bond, in event they receive the contract, of \$5,000,000. Performance bonds in this sum have been required in the past only of the successful bidders for construction of Boulder Dam and the foundation of the Grand Coulee Dam. In addition they must be prepared to post a payment bond of \$2,500,000, one of the largest on record. The payment bond required under the Bacon-Davis Act is an assurance against default of labor and material bills.

### Power Plant

The work for which bids are now being invited includes completion of Grand Coulee Dam to its full height, construction of the power plant on the west bank of the river, a dam to protect the pumping plant and the foundation of the pumping plant, which, in future, will raise waters from Grand Coulee Dam Reservoir to the balancing reservoir in the Grand Coulee itself for irrigation of the Grand Coulee Basin.

The contractor will not be required to purchase cement, steel, machinery and power house equipment which will go into the perma-

## HICKAM FIELD BARRACKS BIDS ARE SCHEDULED

**Barracks, Warehouse Proposals to Open December 15;  
Quarters December 1**

Plans for making Hickam Field, T. H., America's key defensive station in the Pacific made another advance last week as bids were called, to be opened December 15, for construction of two barracks and a warehouse.

The action followed the call for bids November 2 for construction of quarters estimated to cost \$1,000,000. Bids for the quarters will be opened December 1.

Plans for the barracks and warehouse call for construction of four 132-man Air Corps Barracks, one 200-man Air Corps Barracks and one Quartermaster warehouse, together with appurtenances.

### Plans Available Here

Plans and specifications for the structures may be obtained from the Constructing Quartermaster at Fort Mason, upon deposit of \$20. Bids will be opened at 1:30 P. M., December 15.

Bids were called, to be opened December 1, earlier in the week for construction of quarters.

Largest item in the \$1,000,000 project will be construction of 39 sets of Field and Company Officers' quarters at an estimated cost of \$509,000. Thirty-nine buildings are involved.

Plans also call for construction of 42 sets of N.C.O. quarters at an estimated cost of \$352,000. Construction involves 37 buildings.

Bids will be received by the Constructing Quartermaster, Fort Mason, or the Purchasing and Contracting Officer, Hickam Field, December 1. Plans and specifications may be obtained from either office upon deposit of \$10.00.

## Bids November 24 On \$80,000 School

Bids for construction of the \$80,000 first unit of Whittier Elementary School addition will be opened November 24. The Berkeley Unified School District announced yesterday. Plans were prepared by Architects P. L. Dragon, C. R. Schmidt, B. R. Hardman and G. Officer, Structural engineer on the project is William Adrian.

The \$80,000 addition will contain an auditorium, a cafeteria and five classrooms. A second unit of the project to house classrooms and offices will be constructed next June, it is announced.

ent structure, but will be required to install this material with the exception of the power house equipment which will be installed by the Bureau of Reclamation.

## PETALUMA ASKS BIDS FOR TWO PWA PROJECTS

**Council Advertises Sewers,  
Fire Station Following Final  
Approval of Plans**

Bids for construction of the Petaluma sewer system will be opened November 30, it was announced this week. The city council took steps to advertise the project immediately following approval of plans and specifications by the Public Works Administration.

The project will be financed in part by a PWA grant of \$142,100, and will cost in its entirety about \$315,800, it is estimated.

The project includes construction of intercepting sewers, river crossing, storm water sewer separation, sewage pumping plant, and sewage treatment plant.

Harry N. Jenks of Berkeley, consulting engineer for the Petaluma sewer project, said yesterday that another sewer job for which he is consultant, that at Placerville, will be out for bids shortly.

### Fire Station

The Petaluma city council also has advertised for bids on its second project of the new PWA program, the \$36,500 fire station.

To be located at the northerly corner of D and Second streets, the station will be a one-story frame and stucco building, with steel roof trusses and columns. Bids will be opened November 26.

Plans for the fire station were prepared by Architect Brainerd Jones of Petaluma, with C. Jefferson Sly of San Francisco, as structural engineer.

The Petaluma projects were the latest in a flood of Northern California jobs which final approval by PWA has placed on the market. In addition to a number of school projects, the \$80,000 Santa Cruz city hall went out for bids this week. They will be opened December 6. C. J. Ryland is architect.

## CONFERENCE ON ZONE PROBLEMS SET BY ICKES

City, County, State, Federal  
Groups to Meet in  
Washington

A nation-wide zoning conference to be held in Chicago on December 13 and 14 was called today by Secretary of the Interior Harold L. Ickes, acting as Chairman of the National Resources Committee.

The Committee hopes that representatives of city and county zoning commissions and planning boards as well as State Planning Boards, Federal Bureaus and unofficial groups will attend.

The purpose of the Conference is to consider zoning problems and practice at all levels of government in the hope that general adoption of modern and practical methods may be stimulated. All phases of the question will be discussed by experts in the various fields.

In announcing the Conference Secretary Ickes said:

### Discussion Needed

"A demand for a thorough reconsideration of zoning problems has existed for some time.

"In the urban field most zoning ordinances are from ten to fifteen years old and a great number of communities are contemplating revision in the light of recent knowledge and experience. A zoning conference can be a great help to these communities and to others who may decide upon revisions in the future through frank discussion of common problems and ways to meet them.

"While rural zoning is a comparatively new field there are many problems of better land use concerning which it will be valuable to define objectives and policies.

### Flood Regions

"Another subject which will come in for serious discussion is the desirability of zoning of flood plains for the prevention of unwarranted investments some of which might lead to further demands for flood protection at public expense.

"In short, the Conference will endeavor to give impetus to a sustained national interest in the full development of communities along proved and practical lines."

After a two-day discussion of the general subject a final discussion of the Conference on rural, urban, flood, plain and recreational zoning and will present "a positive program for zoning."

The first structure of the 1939 Golden Gate International Exposition on San Francisco Bay to be completed framed is the "Hall of the Mineral Empire." This structure, which opens directly off the main court, is 200 feet wide and 415 feet in length.

## Deschutes Project Construction Wins Approval of Bureau

Secretary of Interior Harold L. Ickes this week announced that the President had approved the Department's finding that the Deschutes Federal Reclamation project near Madras, Ore., is feasible.

The finding of feasibility and its approval by the President is required under Reclamation law prior to commencement of actual construction of a new project.

The Deschutes project was adopted by the Congress last year when an appropriation of \$450,000 for commencement of its construction was included in the Interior Department Appropriation Bill for the fiscal year 1937. This money was continued available for the fiscal year 1938, although no new appropriation was made this year, since the project had not yet been started.

### Wickiup Dam

The Deschutes project is designed to provide irrigation water for 50,000 acres of dry but fertile lands immediately north of Madras, on the east side of the Deschutes River in central Oregon. The principal engineering features of the project, as now planned, include Wickiup Dam and reservoir on the Deschutes River, designed to conserve and divert 209,000 ac-ft. of water, a main canal extending from Bend, north for 65 miles, to the Agency Plains near Paxton, a steel siphon, 7,660 feet long, near Terrebonne, across the Crooked River, smaller canals and laterals and other canal structures.

The Wickiup Dam, as now proposed, would be located 40 miles above Bend and would be an earth embankment, 83 feet high and 3,100 feet long, with auxiliary dikes on either side, one 14,900 feet long, the other 3,600 feet.

The main canal would be located largely through rock cuts and would require considerable concrete and gunite lining.

The estimated cost of the Deschutes project is \$8,000,000. Work estimated to cost slightly in excess of \$2,000,000 and including clearing the reservoir, which will cover 11,200 acres, and lining the canals, preparing concrete aggregates, etc., will be done by Civilian Conservation Corps men.

### Balance Repayable

The remainder of the cost of the project will be repayable in forty years by water users on the project lands.

Most of the 50,000 acres to be irrigated in times past have been cultivated, with grain crops predominating, in years of better rainfall. Houses and barns still dot the area, although most of them are unoccupied. The few who have managed to remain on the land have done so only through outside assistance. Weather re-

## A.G.C. CHAPTER PLANS DETAILS OF CONVENTION

Plans for the coming convention of the Northern California chapter, Associated General Contractors, to be held in San Francisco December 17 and 18, indicate it will be the "biggest and best" ever, according to Secretary-Manager Floyd O. Booe.

Back from Washington, D. C., where he attended the Fall board meeting of the national A.G.C., Mr. Booe was busy with preparations for the two-day convention next month.

According to present plans, the entire business session of Friday afternoon, December 17, will be devoted to labor relations, including thoroughgoing discussion of agreements and other aspects of the topic, so vital at the present moment.

### To Name Committees

Convention committees on nominations, resolutions and others also will be appointed at the Friday session, which will be a closed meeting for members only.

An outstanding program is being formulated for the Saturday morning sessions, with prominent speakers outlining work in prospect for the coming year and reviewing that achieved during the past year. Officers for the next year will be elected Saturday.

The convention banquet - dance will be held Saturday night, December 18, in the Palm Court of the Palace hotel, and present indications are that between 700 and 800 couples will be in attendance.

Regular convention sessions will be held in the California Room of the Palace hotel, Mr. Booe said.

ords show conclusively that the area can not be farmed permanently without irrigation.

The people residing in the area have organized and approved a tentative repayment contract.

### Land Division

Lands of the project will be divided into single family farm units. Present owners will be permitted to retain 40 acres for a single man or 80 acres for a family. The remainder of their holdings will be appraised by the Government and its sale required, at the appraised price, to new settlers.

John C. Page, Reclamation Commissioner, said that the lands embraced in the project include only the best in the area. Rough lands and poor soils have been eliminated. That remaining can easily be prepared for effective application of water. Properly prepared and properly cultivated, good yields of all crops grown in that locality are assured. With settlers carefully selected and suitably equipped for the new venture, success of the Deschutes project reasonably may be anticipated.

## ADVERTISE DAM, CANAL PROJECT

Bids for construction of Las Viboras dam and canals will be opened November 22, directors of the Pacheco Pass Water District have announced. Proposals will be received at the office of the board's secretary, L. G. Barrett, in the Bank of America building, Hollister.

In addition to excavation and embankment for the dam, the job involves about 46,000 square feet of two-inch concrete canal lining and a number of incidental items.

## Fischer Appointed Bonneville Counsel

J. D. Ross, Administrator of the Bonneville project, last week announced the appointment of John G. Fischer of Washington as general counsel.

Judge Fischer, who has been Mr. Ross' personal counsel in Washington for the last five years, recently resigned as a member of the United States Board of Veterans Appeals to which he was appointed by President Roosevelt in 1933. Before joining the Veterans Service he was Special Assistant to the Commissioner of Fisheries and served as counsel for various public power organizations.

Judge Fischer was Mayor of Eldora, Colo., in 1920 and 1921 and Assistant Deputy Prosecuting Attorney of Boulder, Colo., in 1921 and 1922. He is a graduate of the Universities of Washington and Colorado. His home is in Seattle, Wash. He is married and has one child.

The Bonneville Authority was created in the Department of the Interior at the last session of Congress for the purpose of handling the power produced at the Bonneville Dam on the Columbia River near Portland, Oregon.

## CATALOG LISTS STORE LIGHTING LUMINAIRES

Direct-indirect lighting for store interiors with Storlite luminaires is the subject of a catalog section recently published by the Westinghouse Electric and Manufacturing Company. Described are the two styles available, the plastic louvers for directing the light and shielding the lamp, construction, light distribution curve and average lighting intensities for various spacings and mounting heights. Copies of the publication are available from the Lighting Division, Westinghouse Electric & Manufacturing Co., Cleveland, Ohio.

San Francisco's 1939 World's Fair will be located on an island in the harbor, within sight of \$110,000,000 worth of bridges—the two greatest in the world.

## Clay Products Residence Design Awards Announced; Calif., N. Y. Architects Lead

Awards have been made to more than forty architects and designers by Structural Clay Products Institute, Inc., Washington, D. C., as prizes and honorable mentions in a group of competitions for designs and photographs of brick and structural clay tile houses. George D. Conner, architect, of Washington, D. C., won \$500 first prize for an original small house of five rooms and bath. Atwell John King of

New York City won first prize of \$500 for his design of a seven room house and also took second prize of \$250 in the small house group. Walter E. Conklin, architect, of Decatur, Georgia, won first prize of \$250 for photographs and plans for a completed house of seven rooms; and T. H. Buell Co., architects of Denver, Colorado, were awarded first prize of \$200 for a group of monumental buildings notable for their excellent architectural detail in brick and clay masonry.

### Jury Members

Dwight James Baum, F.A.I.A., internationally noted architect of New York served as chairman of the jury which made the awards. Architectural members included Louis La Baume, F.A.I.A. of St. Louis, William Stanley Parker, F. A. I. A., of Boston (both past vice-presidents of the American Institute of Architects) and D. K. Este Fisher, Jr., A.I.A., of Baltimore. Herbert U. Nelson, secretary of the National Association of Real Estate Boards, Chicago, and W. C. Miller, real estate developer of Washington, D. C., served as realtor members of the jury to check the sales value and popular appeal of the designs entered.

Federal Housing Administration authorities consider Geo. D. Conner's prize-winning design to be an exceptionally fine example of an economical, soundly planned house of good quality. Arrangements are being made for the erection of this model house in many cities throughout the United States. Of this house, the Jury's report says: "A beautifully studied small house, simple and compact in plan with rooms well arranged, economical to build. The garage is well placed for front entrance type, and has a shielded and covered entry for inclement weather. All wall elevations are well studied, simple, good American architecture, expressing best taste in the use of brick and clay masonry."

### Modified Georgian

This house has a living room, dining room and efficient kitchen on the ground floor, and two bed room and one bath on the second. Space in the basement is reserved for a recreation or hobby room. Closets are of correct shape and adequate size. The style is modified Georgian or Colonial in spirit but would fit well in almost any neighborhood. It can be developed in dark or light colored masonry using solid or hollow brick construction or structural clay (hollow) tile faced with brick.

Entries were received from nearly every state and awards were made to architects and designers in sixteen states and the District of Columbia. New York and California divided first honors with seven awards each. The complete list of entries follows:

Competition for design of original small clay masonry houses: First prize \$500, George D. Conner, 5714 Chevy Chase Parkway, Washington, D. C.; second prize \$250, Atwell John King, 601 W. 140th Street, New York, N. Y.; third prize \$100, Earl F. Cleland, 45 E. Patterson Ave., Columbus, Ohio. Honorable mentions, each carrying awards of \$50 were given designs by L. C. Cavitt, Jr., Wichita, Kansas; J. F. Dworski, Detroit, Michigan; Harold H. Ehler, Detroit, Michigan; Arthur B. Gallian, Berkeley, Calif.; Jack D. Gilchrist, Santa Barbara, Calif.; Charles E. Haupt, Washington, D. C.; Ralph E. Hohlt, St. Louis, Mo.; J. E. Miller, Chicago, Ill.; John P. Morgan, Philadelphia, Pa.; Hayward Peirce, Arlington, Mass.

### Medium-Sized Houses
